

Medugu Wali

Software Engineer · App Developer · Activist

Idu Industrial District, FCT Abuja · 09061950587 · blueparticlestudios@gmail.com

LinkedIn: MeduguWaliLinkedin · GitHub: github.com/WaliMedugu · Portfolio: walimedugu.com

PROFESSIONAL SUMMARY

Software engineering student with hands-on experience building mobile and web applications — from concept and design to deployment. Focused on Android-first, privacy-conscious, and offline-capable solutions. Strong interest in cybersecurity, automation, and practical problem-solving tools that work in real-world, resource-constrained environments. Comfortable across frontend, backend, and product design, with a track record of leading independent projects and competitive hackathon teams.

EDUCATION

B.Sc. Software Engineering 2023 – Present

200-Level · Nile University, Abuja, Nigeria

Core areas: software engineering lifecycle (SDLC), data structures, networking, mathematics

EXPERIENCE & LEADERSHIP

Founder & Lead Developer · Blue Particle Studios 2023 – Present

Abuja, Nigeria

Leading all operations, project direction, and development across multiple apps and platforms. Ships independent products spanning mobile, web, automation, and civic tech.

Founder · Femn 2024 – Present

Established and manages a safety and activism hub connecting minority groups with therapy resources. Built the platform end-to-end: SRS, prototyping, React, and Flutter conversion.

Director of Social Media · Nile Model United Nations 2023 – 2024

Managed digital presence and communications for Nile MUN across all platforms. Spearheaded medical aid campaigns targeting underprivileged communities and organized outreach programs providing medical assistance to underserved populations.

Content Creator · TikTok / Independent 2023 – Present

Develops and manages content focused on mental health awareness, safety, and social activism.

SEO Writer & Tech Blogger · Independent 2023 – Present

Writes technical and SEO-optimized content for WordPress platforms using Rank Math. Combines product thinking with writing to create content that ranks and informs.

PROJECTS

Production-Ready & Launched

Beacora — Location-Based Safety App

Real-time tracking, emergency beacons, and privacy override system for trusted connections. Offline alert system using Bluetooth and SMS for low-connectivity environments. Security-first design focused on vulnerable users.

Spaver — Personal Finance App (Flutter · Supabase)

UBA SMS transaction parsing with local SQLite storage. Tracks balance, expenses, income with goal-setting and financial history. Blue Particle Studios branding with full design pass and legal documentation.

WherAreThey — Missing Persons Database (Civic Tech)

Community-based missing persons tracking and coordination platform. Designed for rapid deployment in vulnerable Nigerian communities.

Not Even Wali — Substack Publication (Active)

Dual-niche publication covering global activism and poetry/romance with strict voice rules. Daily content production (late Feb – early Mar 2025).

Ongoing & In Development

Arguuu — Competitive Real-Time Debate App (Flutter · Supabase)

Femn — Safety & Activism Hub (Flutter · React)

Platform connecting minority groups with therapy resources, emergency support, and activist networks. End-to-end built with SRS, React prototype, and full Flutter conversion. Warm Editorial design system applied.

Hackathon Arsenal — 18 Vetted Product Ideas (Ongoing Build Briefs)

Curated, no-AI, no-hardware solo-buildable products proven in winning hackathon tracks. Categories: HealthTech, AgriTech, Civic Tech, Dev Tools.

HealthTech Projects:

DischargeLoop (post-discharge patient safety), SymptomChain (symptom tracking network), RxScan (medication verification), VeinMap (vein access mapping), DoseBridge (medication adherence)

AgriTech Projects:

FarmPulse (soil & crop monitoring), CropClock (seasonal planning), HarvestClock (harvest timing), FoodLedger (harvest tracking & sales)

Civic Tech Projects:

GridLock/Quorum (decentralized governance), Witness (incident documentation), WitnessChain (verified evidence ledger), Palimpsest (narrative archiving)

Dev Tools Projects:

SoundBridge (audio debugging), DeadReckoner (offline navigation), MURMUR (privacy-first messaging), Deadwood (dead code detection), Bloodline (dependency tracking)

Other Notable Projects

Global Goals App — Flutter · Firebase · SDG-focused. Nigeria-specific SDG challenges with awareness content and ad monetization.

Flutter Voice Assistant — Offline speech recognition using Vosk with always-on microphone, real-time display, and session logging.

3D Ocean Basket Website — Vite · Three.js · GSAP. Ocean-themed UI with animated 3D models and scroll interactions.

AI-Assisted AST Platform (Concept) — Healthcare diagnostics via mobile imaging and AI analysis with web dashboard.

Activism & Movement App (Concept) — Cause discovery, educational content, news aggregation, and action-based engagement.

ACHIEVEMENTS

Wema Bank Hackaholics 6.0 — Regional Winner with Team Tensor; fintech project WalletPaddi

Team Lead & Compiler — Directed team project building Classroom and Seat Allocation system

Project M.A.S.K. Volunteer — Games Day facilitation at Kuchingoro IDP camp

Millennium Fellowship Class of 2026 (MCN) — Applied with portfolio of 8+ projects

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, Dart

Frameworks & Tools: Flutter, Firebase, Supabase, Kivy, Vite, Three.js, GSAP, React

Security: Penetration testing, offline-first architecture, privacy-conscious design

Automation: AutoHotkey v2, Excel workflow automation

Voice / AI: Vosk offline speech recognition, Google Speech API

App Dev: WebView-based app development, Android-first architecture

Design: Figma → code implementation, UI/UX, neumorphic & editorial interfaces, design systems

Other: SEO writing (WordPress + Rank Math), product design thinking, SDLC, automated testing

SOFT SKILLS

Leadership · Project Management · Public Speaking · Community Building · Social Media Strategy · Crisis Communication · Social Activism · Facilitation · Quick Learner · Creative-Technical Thinking · Emotionally Intelligent Communication

INTERESTS

Speedsolving Rubik's cubes · Violin · Photography · Acrylic painting (hyperrealism, symbolism) · Content creation · UI design · Literary fiction · OSINT tooling
